

TransPennine Express Class 802 Announcement Pack

By Wrightline Sim

Introduction

Thank you for purchasing the WLS: TPE 802 Announcement Pack. This pack allows you to have announcements onboard your train to add an extra layer of realism to your driving experiences! It all comes packaged up in easy-to-use software.

Installation

To install this software, drag and drop the plugins folder into your Railworks folder. Once done, go to the plugins folder, look for *WLS TPE 802 Announcement Pack.exe*, right click and make a shortcut to put on your desktop if you so wish. Once done, run the software.

You should only input a code from the list below once you have opened up Train Sim Classic in 64-bit and have a scenario running with a destination set, otherwise the software will state that no control value was found. Overall, it is as easy as that! We hope you enjoy the pack!

Make sure to download and install the branding patch available on the product page. This contains the realistic audio for the plugin.

Route Codes & Calling Patterns

1001: ATS Chat Moss

Calling Points:

- Liverpool Lime Street
- Newton-le-Willows
- Manchester Victoria
